

ANKIT KUMAR

Senior Engineering Manager | MarTech & SaaS

Bengaluru, India | Open to Global & Remote Roles

dev.ankit.kkumar@gmail.com | +91 83607 48334 | linkedin.com/in/architectak

EXECUTIVE SUMMARY

Engineering leader with 15+ years building distributed systems and scaling global teams across SaaS and MarTech. Currently leading a 20+ person engineering organisation at Docusign, overseeing delivery of multi-agent AI systems using CrewAI and Gleen AI frameworks — with around 20 AI agents now running in production. Deep experience at the intersection of AI, marketing technology, and customer data platforms, serving hundreds of enterprise customers. Track record of influencing product direction, shipping enterprise-scale platforms, and building high-performance cross-continental teams. Seeking Director of AI Engineering or Senior EM, AI/ML role to drive end-to-end AI product delivery at scale.

TECHNICAL SKILLS

AI & Agents: CrewAI | Gleen AI | LangChain | Multi-agent orchestration | LLM APIs | RAG pipelines | Prompt engineering | Agentic workflows

Languages: Python | JavaScript | TypeScript | Node.js

Cloud & Infra: AWS | Docker | Kubernetes | Microservices | API-first architecture | Event-driven systems

Data Platforms: Snowflake | Customer Data Platforms (CDP) | Marketing automation | Analytics workflows

Frontend: React.js | Node.js component libraries

Leadership: Org design | Headcount planning | OKRs | Roadmap ownership | Stakeholder alignment | Cross-timezone delivery

CORE COMPETENCIES

AI & Agent Systems | Engineering Leadership | Platform Architecture | MarTech & CDP | Distributed Systems | Cross-functional Collaboration | Org Design & Hiring | Metrics-driven Delivery | Stakeholder Management | Executive Communication

PROFESSIONAL EXPERIENCE

Senior Engineering Manager, AI & Marketing Technology

Docusign | Bengaluru, India Jul 2024 – Present

Leading AI agent delivery and platform engineering for Docusign's marketing technology organisation, managing a 20+ person cross-continental team across India and the US.

- Lead a 20+ person distributed engineering team across India and San Francisco, driving full lifecycle delivery of AI-powered and customer-facing platform capabilities
- Delivered 3–5 multi-agent AI systems into production using CrewAI and Gleen AI frameworks, automating marketing workflows and customer engagement pipelines for hundreds of enterprise customers
- Partner with Product, Business, and Data Science stakeholders to define AI agent roadmaps, translating business requirements into scalable LLM-based architectures and agentic pipelines
- Established engineering best practices for AI system design — including observability, reliability, and evaluation (evals) frameworks — across all agentic systems in production
- Drive metrics-driven engineering culture: tracking AI system performance, adoption signals, and delivery health; reduced cross-timezone delivery friction through structured async processes
- Mentor engineers and managers on AI-first development practices, growing team capability in LLM integration, prompt engineering, and RAG pipeline design
- Influence product direction by identifying automation opportunities in workflows, data pipelines, and customer engagement patterns; contributed to roadmap planning at Director level

Software Engineering Lead, Marketing Technology & FinTech

LatitudePay Asia | Bengaluru, India Jul 2023 – May 2024

- Led engineering for customer-centric fintech and marketing technology platforms supporting business-critical BNPL workflows at scale

- Drove architectural decisions for high-availability, scalable systems supporting rapid business growth across Southeast Asia
- Built and mentored engineering teams across multiple squads, improving delivery velocity, code quality, and engineering culture

Lead Engineer, Retention & Marketing Technology

PropertyGuru Group | Singapore Feb 2021 – May 2023

- Built a data-driven New Home Recommendation Engine and User Profiling system, directly improving user engagement and retention metrics across millions of users
- Spearheaded full tech stack modernisation for the consumer marketplace on AWS, significantly improving platform scalability, reliability, and user experience
- Led and mentored a team of 8 full-stack engineers, building a collaborative high-performance engineering culture with consistent on-time delivery
- Introduced a React.js/Node.js component library, eliminating legacy code debt and accelerating feature delivery timelines

Earlier Experience

REA Asia | Lead Fullstack Engineer | Kuala Lumpur, Malaysia | Sep 2019 – Feb 2021

Maybank | Senior Software Engineer | Kuala Lumpur, Malaysia | Jan 2017 – Sep 2019

GoodWorkLabs | Mobile Engineer | Bengaluru, India | Oct 2015 – Dec 2016

22by4 | Mobile Engineer | Bengaluru, India | Jul 2012 – Oct 2015

AI & INNOVATION CREDENTIALS

- **Advance Certification in AI for Leaders — IIM Calcutta, India**
- **Advanced Certification in Blockchain Technology — IIIT Bangalore, India**
- **Certified in Generative AI — Snowflake & Vanderbilt University**
- **Certified in Data Science Methodology — IBM**

Applied AI — production context:

- Hands-on leadership of 3–5 multi-agent AI systems in production using CrewAI and Gleen AI at Docusign
- Working knowledge of LLM architectures, RAG pipelines, prompt engineering, vector databases, and AI-driven workflow automation
- Experience integrating AI agents with marketing automation, CDPs, and customer engagement platforms serving enterprise customers
- Familiar with agent evaluation frameworks (evals), agent memory, tool-use patterns, and MLOps concepts for agentic systems

KEY ACHIEVEMENTS

- Delivered 3–5 production AI agents at Docusign, building the company's first multi-agent automation capability for enterprise marketing operations
- Led and scaled a 20+ person cross-continental engineering organisation (India + US) within 12 months of joining Docusign as first-time EM
- Shipped a Recommendation Engine and User Profiling system at PropertyGuru, directly improving engagement and retention for millions of users
- Built and led engineering teams across 5 companies over 15 years spanning India, Singapore, and Malaysia — from mobile to distributed SaaS platforms
- Influenced product roadmaps at Director level through engineering insights, customer feedback loops, and cross-functional business partnership

EDUCATION

B.Tech, Computer Engineering | GB Pant University, Pantnagar, India

OPEN TO ROLES

Director of AI Engineering | Senior Engineering Manager, AI/ML | Head of AI Agents | VP Engineering (AI-first) | Director of Platform Engineering | AI Product Engineering Lead

Open to global opportunities, relocation, and remote-first roles. Available for travel.
