

Ankit Kumar

Bengaluru, India | Senior Engineering Leader | Global leadership and Experience

dev.ankit.kkumar@gmail.com | 8360748334 | <https://www.linkedin.com/in/architectak/>

DIRECTOR-LEVEL ENGINEERING LEADER

AI-Driven Platforms | Customer-Focused Engineering | SaaS | MarTech

- Engineering leader with 15+ years of experience building and scaling distributed systems and high-performing global teams across SaaS and marketing technology domains. Currently leading cross-continental engineering teams delivering customer-facing platforms. Strong track record of partnering with Product and Business stakeholders to translate real-world customer needs into scalable platform capabilities.
- Experienced in data platforms, AI/ML concepts, and modern MarTech ecosystems, with growing focus on applying Generative AI and agent-based systems to enhance customer experience and automation. Passionate about driving innovation, influencing product direction, and building organizations that thrive in ambiguity.

CORE COMPETENCIES

Leadership & Strategy

- Organizational design, hiring, and scaling global teams
- Cross-functional leadership (Product, Data, Business)
- Execution in ambiguous, high-growth environments

AI & Data Platforms

- Generative AI & LLM concepts
- Data platforms (Snowflake), analytics workflows
- Customer Data Platforms (CDPs) & marketing automation

Architecture & Engineering

- Distributed systems & scalable platform design
- API-first architecture & microservices
- Observability, reliability, and performance optimization

Customer & Product Impact

- Customer-centric engineering delivery
- Product roadmap influence through engineering insights
- Stakeholder management and executive communication

PROFESSIONAL EXPERIENCE

Docusign | Bengaluru, India

Senior Engineering Manager, Marketing Technology

July 2024 - Present

- Lead a distributed engineering team across India and the US, delivering scalable, customer-facing platform capabilities in a global SaaS environment
- Partner closely with Product, Business, and Data teams to translate customer and market requirements into robust technical solutions
- Drive execution of platform initiatives that improve customer adoption, usability, and operational efficiency
- Influence product roadmap by identifying gaps in workflows, data pipelines, and system capabilities based on real-world usage patterns
- Establish engineering best practices for system design, performance, and reliability, improving platform scalability and stability
- Implement metrics-driven engineering processes, tracking delivery, system health, and adoption signals to guide decision-making
- Mentor engineers and managers, fostering a high-performance, inclusive, and growth-oriented team culture

LatitudePay Asia | Bengaluru, India

Software Engineering Lead, But Now Pay Later (BNPL)

July 2023 - May 2024

- Led development of customer-centric fintech and marketing technology solutions, supporting business-critical workflows
- Collaborated with cross-functional teams to design and deliver features aligned with customer needs and regulatory requirements
- Improved system performance, reliability, and scalability to support rapid business growth
- Contributed to architectural decisions and long-term platform strategy
- Built and mentored engineering teams, improving delivery velocity and quality

Propertyguru Group | Singapore
Lead Engineer, Retention & Marketing Technology
Feb 2021 - May 2023

- Conceptualised and executed **consumer-centric SaaS products**, including innovative solutions such as Users Profiling, and a cutting-edge New Home Recommendation Engine. Resulted in **boosted user engagement and retention rates**.
- Provided **mentorship and guidance** to a dynamic team of **8 full-stack engineers**, fostering a culture of **collaboration, innovation, and continuous learning**. Resulted in motivated, efficient team that consistently delivered **high-quality solutions**.
- Spearheaded a comprehensive overhaul of the tech stack within the **consumer product marketplace**, focusing on enhancing **scalability, reliability, and overall performance**. This transformation not only **future-proofed** the platform but also led to noticeable improvements in user experience and operational efficiency. Applications were running on **AWS Cloud**.
- Introduced and curated an elements library dedicated to Reactjs and Nodejs components, effectively addressing legacy code challenges and facilitating a more modular and scalable development process. This initiative streamlined development efforts and accelerated feature delivery timelines.

EARLIER EXPERIENCES

REA Asia | Lead Fullstack Engineer | Kuala Lumpur, Malaysia | Sep 2019 - Feb 2021
Maybank | Senior Software Engineer | Kuala Lumpur, Malaysia | Jan 2017 - Sep 2019
GoodWorkLabs | Mobile Engineer | Bengaluru, India | Oct 2015 - Dec 2016
22by4 | Mobile Engineer | Bengaluru, India | Jul 2012 - Oct 2015

AI & INNOVATION EXPERIENCE

- Advance Certification in **AI for Leaders from IIM Calcutta**, India
- Advanced Certification in **Blockchain Technology from IIIT Bangalore**, India
- Certified in Generative AI (Snowflake, Vanderbilt University)
- **Certified in Data Science Methodology (IBM)**
- Working knowledge of LLM-based architectures, APIs, and AI-driven workflows
- Exploring applications of AI agents in marketing technology and customer engagement platforms
- Experience with data-driven systems enabling personalization, automation, and insights

GLOBAL LEADERSHIP EXPERIENCE

- Managed distributed teams across Bengaluru and San Francisco
- Built processes for effective cross-timezone collaboration and delivery
- Led hiring, mentoring, and career development for engineers and analysts
- Fostered inclusive and high-performing team environments

EDUCATION

- **Bachelor of Technology** (Computer Engineering) from **GB Pant University, Pantnagar**, India

RELEVANT ACHIEVEMENTS

- Successfully scaled engineering team and platform capabilities supporting enterprise customers
- Drove improvements in platform performance and reliability, enabling higher adoption
- Influenced product direction through engineering insights and customer feedback loops
- Built strong cross-functional partnerships to accelerate delivery and innovation

ADDITIONAL INFORMATION

- Open to global roles and travel
- Strong interest in AI-driven product innovation and customer-centric engineering
